CONTENTS

Number 1

C. H. Roth, M. A. Malicki & R. Plagge. Empirical evaluation of the relationship between soil dielectric constant and volumetric water content as the basis for calibrating soil moisture measurements by TDR 1

A. J. Koppi, J. T. Douglas & C. J. Moran. An image analysis evaluation of soil compaction in grassland 15

B. Jańczuk, T. Białopiotrowicz, A. Zdziennicka, M. Hajnos & G. Józefaciuk. The influence of soil clay constituents on surface free energy of clay fractions 27

N. J. Barrow. A brief discussion on the effect of temperature on the reaction of inorganic ions with soil 37

F. Bartoli, R. Philippy, J. M. Portal & B. Gerard. Poorly ordered hydrous Fe oxides, colloidal dispersion and soil aggregation. I. Effect of humic macromolecules on surface and colloidal properties of Fe(III) polycations 47

F. Bartoli, R. Philippy & G. Burtin. Poorly ordered hydrous Fe oxides, colloidal dispersion and soil aggregation. II. Modification of silty soil aggregation with Fe(III) polycations and model humic macromolecules 59

B. Singh & R. J. Gilkes. Properties and distribution of iron oxides and their association with minor elements in the soils of south-western Australia 77

G. Dios Cancela, E. Romero Taboada & F. Sánchez-Rasero. Carbendazim adsorption on montmorillonite, peat and soils 99

L. Benzing-Purdie, M. V. Cheshire, B. L. Williams, C. I. Ratcliffe, J. A. Ripmeester & B. A. Goodman. Interactions between peat and sodium acetate, ammonium sulphate, urea or wheat straw during incubation studied by ^{13}C and ^{15}N NMR spectroscopy 113

B. Manunza, C. Gessa, S. Deiana & R. Rausa. A normal distribution model for the titration curves of humic acids 127

B. van Wesemael & M. A. C. Veer. Soil organic matter accumulation, litter decomposition and humus forms under mediterranean-type forests in southern Tuscany, Italy 133

K. B. Zwart & J. F. Darbyshire. Growth and nitrogenous excretion of a common soil flagellate, *Spumella* sp.—a laboratory experiment 145

A. B. McBratney & J. J. de Gruijter. A continuum approach to soil classification by modified fuzzy *k*-means with extragrades 159

R. Webster & M. A. Oliver. Sample adequately to estimate variograms of soil properties 177

Number 2

P. A. Burrough, R. A. MacMillan & W. van Deursen. Fuzzy classification methods for determining land suitability from soil profile observations and topography 193

H. M. Moore & K. Attenborough. Acoustic determination of air-filled porosity and relative air permeability of soils 211

M. Bonsu. A physically based model for surface sealing of soil 229

R. D. Williams & L. R. Ahuja. Evaluation of similar-media scaling and a one-parameter model for estimating the soil water characteristic 237

A. S. B. Armstrong & T. W. Tanton. Gypsum applications to aggregated saline–sodic clay topsoils 249

C. Beier & K. Hansen. Evaluation of porous cup soil-water samplers under controlled field conditions: comparison of ceramic and PTFE cups 261

M. E. Hamad, D. L. Rimmer & J. K. Syers. Effect of iron oxide on phosphate sorption by calcite and calcareous soils 273

M. G. Whitten, G. S. P. Ritchie & I. R. Willett. Forms of soluble aluminium in acidic topsoils estimated by ion chromatography and 8-hydroxyquinoline and their correlation with growth of subterranean clover 283

N. J. Barrow & V. C. Cox. The effects of pH and chloride concentration on mercury sorption. I. By goethite 295

N. J. Barrow & V. C. Cox. The effects of pH and chloride concentration on mercury sorption. II. By a soil 305

S. P. McGrath & J. Cegarra. Chemical extractability of heavy metals during and after long-term applications of sewage sludge to soil 313

R. J. Haynes & P. H. Williams. Changes in soil solution composition and pH in urine-affected areas of pasture 323

E. S. Jensen. The release and fate of nitrogen from catch-crop materials decomposing under field conditions 335

R. G. Jörgensen & G. M. Richter. Composition of carbon fractions and potential denitrification in drained peat soils 347

M. V. Cheshire, J. D. Russell, A. R. Fraser, J. M. Bracewell, G. W. Robertson, L. M. Benzing-Purdie, C. I. Ratcliffe, J. A. Ripmeester & B. A. Goodman. Nature of soil carbohydrate and its association with soil humic substances 359

A. R. Kalbande, D. K. Pal & S. B. Deshpande. *b*-Fabric of some benchmark Vertisols of India in relation to their mineralogy 375

Book Reviews 387

List of Referees in 1991 399

Number 3

H. A. Laya, J. A. de la Peña & J. Benayas. Neoformed aragonite in clay soils on Keuper materials from east-central Spain 401

A. A. Jafarzadeh & C. P. Burnham. Gypsum crystals in soils 409

N. J. Barrow. The effect of time on the competition between anions for sorption 421

J. A. E. Gibson, I. R. Willett & W. J. Bond. The effects of sulphate and fluoride on the sorption of aluminium by an oxisol 429

D. N. Munns, K. R. Helyar & M. Conyers. Determination of aluminium activity from measurements of fluoride in acid soil solutions 441

J. S. Robinson, J. K. Syers & N. S. Bolan. Importance of proton supply and calcium-sink size in the dissolution of phosphate rock materials of different reactivity in soil 447

J. P. Gustafsson & L. Johnsson. Selenium retention in the organic matter of Swedish forest soils 461

M. Krosshavn, I. Kögel-Knabner, T. E. Southon & E. Steinnes. The influence of humus fractionation on the chemical composition of soil organic matter studied by solid-state ^{13}C NMR 473

M. Krosshavn, T. E. Southon & E. Steinnes. The influence of vegetational origin and degree of humification of organic soils on their chemical composition, determined by solid-state ^{13}C NMR 485

C. Amalfitano, V. Pignalosa, L. Auriemma & A. Ramunni. The contribution of lignin to the composition of humic acids from a wheat-straw amended soil during 3 years of incubation in pots 495

J. Wierzchos, C. Ascaso Ciria & M. T. Garcia-Gonzalez. Changes in microstructure of soils following extraction of organically bonded metals and organic matter 505

M. C. Slattery & R. B. Bryan. Laboratory experiments on surface seal development and its effect on interrill erosion processes 517

W. R. Whalley & C. E. Mullins. Oriented and random sedimentation of plate-like clay particles in high centrifugal fields 531

C. J. Moran & A. B. McBratney. Acquisition and analysis of three-component digital images of soil pore structure. I. Method 541

C. J. Moran & A. B. McBratney. Acquisition and analysis of three-component digital images of soil pore structure. II. Application to seed beds in a fallow management trial 551

D. J. Brus, J. J. de Gruijter & A. Breeuwsma. Strategies for updating soil survey information: a case study to estimate phosphate sorption characteristics 567

R. Webster & B. Boag. Geostatistical analysis of cyst nematodes in soil 583

Number 4

P. Goovaerts. Factorial kriging analysis: a useful tool for exploring the structure of multivariate spatial soil information 597

R. W. Payton. Fragipan formation in argillic brown earths (Fragiudalfs) of the Milfield Plain, north-east England. I. Evidence for a periglacial stage of development 621

B. Singh & R. J. Gilkes. Properties of soil kaolinites from south-western Australia 645

A. Maes, J. Tits, G. Mermans & A. Dierckx. Measurement of the potentially available charge and the dissociation behaviour of humic acid from cobaltihexammine adsorption 669

A. W. Mountney & D. R. Williams. Computer simulation of metal ion–humic and fulvic acid interactions 679

S. Maguire, I. D. Pulford, G. T. Cook & A. B. Mackenzie. Caesium sorption–desorption in clay–humic acid systems 689

K. R. Tate. Assessment, based on a climosequence of soils in tussock grasslands, of soil carbon storage and release in response to global warming 697

L. Madrid & E. Diaz-Barrientos. Influence of carbonate on the reaction of heavy metals in soils 709

P. Chairidchai & G. S. P. Ritchie. The effect of pH on zinc adsorption by a lateritic soil in the presence of citrate and oxalate 723

D. Freese, S. E. A. T. M. van der Zee & W. H. van Riemsdijk. Comparison of different models for phosphate sorption as a function of the iron and aluminium oxides of soils 729

J. Magid, N. Christensen & the late H. Nielsen. Measuring phosphorus fluxes through the root zone of a layered sandy soil: comparisons between lysimeter and suction cell solution 739

R. G. V. Bramley, N. J. Barrow & the late T. C. Shaw. The reaction between phosphate and dry soil. I. The effect of time, temperature and dryness 749

R. G. V. Bramley & N. J. Barrow. The reaction between phosphate and dry soil. II. The effect of time, temperature and moisture status during incubation on the amount of plant available P. 759

T. Magnusson. Studies of the soil atmosphere and related physical site characteristics in mineral forest soils 767

D. R. P. Hettiaratchi, M. F. O'Sullivan & D. J. Campbell. A constant cell volume triaxial testing technique for evaluating critical state parameters of unsaturated soils 791
